Product

Description: Hi Tech Controllers

Serial No:

Background

Hi Tech Systems recognises its obligations as a supplier to operate its business in an environmentally responsible way. It is our aim to comply with all applicable legal, regulatory and corporate requirements and, if it is deemed appropriate, adopt more stringent standards for the protection of the environment and the communities in which we operate.

Approach

Hi Tech Systems develops products that are safe to use, make efficient use of resources, and which can be reused and/or recycled and disposed of safely. We appoint competent people to assist us in meeting our statutory duties including, where appropriate, specialists from outside the organisation.

Policy

Hi Tech Systems manages its business and is collaborating with our suppliers to comply with the European Union Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment ("RoHS") Directive (2002/95/EC), taking effect July 1, 2006 and similar restrictions in other jurisdictions. The RoHS directive prohibits the sale of electronic equipment containing certain hazardous substances such as lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls ("PBB") and polybrominated diphenylethers ("PBDE") above certain minimum levels in the European Union.

Methodology

Compliance with all relevant legislation, taking into account any appropriate exemptions, is achieved based on competent design and manufacture and on assurances from suppliers of components, sub assemblies and other items which form an integral part of the products we supply. Products are not routinely tested and this declaration of compliance reflects our best endeavours and our due diligence to ensure, as far as is reasonably possible, that our products are compliant.

Limitation

This declaration is based on our state of knowledge and belief as of the date that it is provided.

Hi Tech Systems bases its knowledge and belief on information provided by third parties and in certain circumstances laboratory test results and makes no representation or warranty as to the accuracy of such information. Hi Tech Systems has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and substances. In no event shall Hi Tech Systems liability arising out of such information exceed the total purchase price of the product supplied.

Association

Hi Tech Systems is a member of the International Association of Broadcasting Manufacturers (IABM).
